Borman -- One Florida, the politics of educational opportunity, and the blinkered language of preference / Larry Johnson and Deirdre Cobb-Roberts -- Florida's A+ plan : education reform policies and student outcomes -- Reginald S. Lee, Kathryn M. Borman, and William Tyson.
Sommario/riassunto	In Education Reform in Florida, sociologists and historians evaluate Governor Jeb Bush's nation-leading school reform policies since 1999. They examine the startlingly broad range of education policy changes enacted in Florida during Bush's first term, including moves toward privatization with a voucher system, more government control of public

education institutions with centralized accountability mechanisms, and a "superboard" for all public education. The contributors arrive at a mixed conclusion regarding Bush's first-term education policies: while he deserves credit for holding students to higher standards, his policies have, unfortunately, pushed for equality in a very narrow way. The contributors remain skeptical about seeing significant and sweeping improvement in how well Florida schools work for all students.
