Sommario/riassunto

The focus of Richard Zgusta's *The Peoples of Northeast Asia through Time* is the formation of indigenous and cultural groups of coastal northeast Asia, including the Ainu, the "Paleoasiatic" peoples, and the Asiatic Eskimo. Most chapters begin with a summary of each culture at the beginning of the colonial era, which is followed by an interdisciplinary reconstruction of prehistoric cultures that have direct ancestor-descendant relationships with the modern ones. An additional chapter presents a comparative discussion of the ethnographic data, including subsistence patterns, material culture, social organization, and religious beliefs, from a diachronic viewpoint. Each chapter includes maps and extensive references.
