

1. Record Nr.	UNINA9910809216603321
Titolo	High temperature oxides . Part IV Refractory glasses, glass-ceramics, and ceramics // edited by Allen M. Alper
Pubbl/distr/stampa	New York, : Academic Press, 1971
ISBN	1-299-48122-1 0-323-15834-X
Descrizione fisica	1 online resource (xviii, 254 pages) : illustrations
Collana	Refractory materials : a series of monographs ; ; v. 5
Altri autori (Persone)	AlperAllen M
Disciplina	666/.72
Soggetti	Refractory materials Oxides
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Copyright Page; High Temperature Oxides: Refractory Glasses, Glass-Ceramics, and Ceramics; Front Cover; Table of Contents; List of Contributors; Foreword; Preface; Contents of Other Volumes; Chapter 1. Refractory Glasses; I. Introduction; II. Vitreous Silica; III. Reconstructed Glasses; IV. High-Silica Glasses; V. Aluminosilicate Glasses; VI. Aluminate Glasses; References; Chapter 2. Refractory Glass-Ceramics; I. Introduction; II. Factors Controlling the Crystallization of Glass; III. Refractory Glass-Ceramic-Forming Systems; IV. Mullite Glass-Ceramics; V. Barium Feldspar Glass-Ceramics VI. Summary References; Chapter 3. Mullite; I. Introduction; II. The Al ₂ O ₃ -SiO ₂ System; III. The Structures of Sillimanite and Mullite; IV. The Formation of Mullite; V. Physical Chemistry of Mullite Formation; VI. The Effect of Mineralizers on Mullite Formation; VII. Properties of Mullite; VIII. High-Alumina and Mullite Refractories; Acknowledgment; References; Chapter 4. Oxide Spinels; I. Introduction; II. Structure; III. Preparation of Spinels; IV. Physical Properties; V. Ferrites; VI. Summary; References; Chapter 5. Oxides Containing Tungsten; I. Simple Oxides; II. Complex Oxides References Chapter 6. Zinc Oxide; I. Introduction; II. Physical Properties; III. Applications; References; Chapter 7. Slip-Cast Ceramics; I. Introduction; II. Chemistry of Deflocculation; III. Other Factors in Slip-Casting; References; Chapter 8. Zirconia-Alumina-Silica Refractories; I.

Introduction; II. Manufacture; III. Properties; IV. Use Characteristics for Glass Industry Service; V. Applications; References; Chapter 9. Theory of Glass Networks; I. Introduction; II. Model; III. Vitreous Silica; IV. Soda Silica Glasses; V. Viscous Flow; VI. Thermal Expansion; VII. Internal Friction, Conduction, and DiffusionVIII. Densities and Molar Volumes; References; Author Index; Subject Index

Sommario/riassunto

High Temperature Oxides
