Lingua di pubblicazione	Arabo
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [307]-311) and index.
Nota di contenuto	Preliminary Material / O. Kahl -- Introduction / O. Kahl -- Arabic Text / O. Kahl -- English Translation / O. Kahl -- Bibliography / O. Kahl -- Index Of Technical Terms / O. Kahl.
Sommario/riassunto	This book offers a critical Arabic edition, annotated English translation, introductory study, and two-way glossaries of the famous dispensatory composed around the middle of the 12th century CE by the Nestorian physician Ibn at-Tilm. The dispensatory, recognized as a masterpiece already by mediaeval contemporaries, soon after its appearance became the pharmacological standard work in the hospitals and apothecs of Baghdad and the wider Arab East, replacing, after almost 300 years, the vademecum of Sbr ibn Sahl. The dispensatory of Ibn at-Tilmi marks the apogee and the conclusion of centuries of medico-pharmacological development in the Arab world, and it is therefore absolutely essential for a critical understanding of mediaeval Arabic medicine and pharmacy in particular, and premodern science in general.
