Sommario/riassunto	This book is a collection of 13 empirical studies examining the acquisition and processing of Chinese as a second language. On the

acquisition front, these studies explore the acquisition of structures such as the perfective marker *le*, *wh*-questions, *bei*- constructions, and bare nouns, and examine the factors that may affect acquisition such as learners' background, anxiety, and instruction. Processing studies cover topics such as the identification of Chinese tones, the recognition of charact...
