Sommario/riassunto	Das hier vorliegende Gutachten für die Stiftung Deutsche Schlaganfall-Hilfe befasst sich mit den verschiedenen regulatorischen Möglichkeiten einer Installierung von Patientenlotsen im Sozialleistungssystem und liefert dazu Einschätzungen für eine gesetzgeberische Umsetzung. Im Hauptteil des Gutachtens werden u. a. bedarfsauslösende Situationen, Leistungsinhalte, Adressaten, Bereitstellung einer Infrastruktur an Patientenlotsen, Finanzierungsfragen, Qualifikation des Patientenlotsen behandelt. Im Vordergrund steht die Organisation der Leistungserbringung von Patientenlotsen. Ebenso werden Fragen der Zusammenarbeit verschiedener Leistungsträger, so auch der Zusammenarbeit von kommunalen Gebietskörperschaften und Sozialleistungsträgern, erörtert.

## Sommario/riassunto

Fiammetta Palladini's work is one of the most important discussions of Pufendorf to appear in the latter part of the twentieth century. It cut through the existing field of Pufendorf studies, laying bare its inherited templates and tacit assumptions. Palladini was thus able to peel back the 'Grotian' commentary in which the great thinker had been shrouded, revealing a Pufendorf well-known in the 1680s—a formidable and dangerous natural jurist and political theorist—but doubly obscured in the 1980s and still today, by a philosophical history that flies too high to see him, and by a commentary literature that too often does not like what it sees. David Saunders' remarkable translation carries Palladini's argument into English with maximum fidelity.
