

1. Record Nr.	UNINA9910809397003321
Autore	Harder Peter
Titolo	Meaning in mind and society : the social turn in cognitive linguistics // by Peter Harder
Pubbl/distr/stampa	Berlin ; ; New York, : De Gruyter Mouton, 2010
ISBN	1-282-88473-5 9786612884733 3-11-021605-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (528 p.)
Collana	Cognitive linguistics research ; ; 41
Classificazione	ER 630
Disciplina	306.44
Soggetti	Cognitive grammar Sociolinguistics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Introduction -- Chapter 1. The heartland of Cognitive Linguistics -- Chapter 2. From conceptual representations to social processes: aspects of the ongoing social turn -- Chapter 3: Social constructions and discourses -- Chapter 4. The foundations of a socio-cognitive synthesis: social reality as the context of cognition -- Chapter 5. Meaning and flow: the relation between usage and competency -- Chapter 6. Structure, function and variation -- Chapter 7. Meaning and social reality -- Chapter 8. Multi-ethnic societies: discourses vs. social cognitive linguistics -- Chapter 9: Summary and perspectives -- Backmatter
Sommario/riassunto	Meaning is embodied - but it is also social. If Cognitive Linguistics is to be a complete theory of language in use, it must cover the whole spectrum from grounded cognition to discourse struggles and bullshit. This book tries to show how. Cognitive Linguistics knocked down the wall between language and the experiential content of the human mind. Frame semantics, embodiment, conceptual construal, figure-ground organization, metaphorical mapping, and mental spaces are among the results of this breakthrough, which at the same time provided cognitive science as a whole with an essential human dimension. A new phase began when Cognitive Linguistics started to

see itself as part of the wider movement of 'usage-based' linguistics. Bringing about an alliance between mind and discourse, it complemented the conceptual dimension that had been dominant until then with a 'use' dimension - thereby living up to the explicit 'experiential' commitment of Cognitive Linguistics. This outward expansion is continuing: The focus on 'meaning construction', which began with the theory of blending, highlights emergent, online effects rather than underlying mappings. Cognitive Linguistics is integrating the evolutionary perspective, which links up individual and population-based features of language. The empirical obligations incurred by this expansion have led to greatly increased attention to corpus and experimental methods, especially in relation to sociolinguistic and language acquisition research. The book describes this development and goes on to discuss the foundational challenge that it creates for Cognitive Linguistics as it begins to cover issues that are also central to types of discourse analysis focusing on social processes of determination. The book argues for a synthesis based on a renewed Cognitive Linguistics, which can accommodate everything from bodily grounding to deconstructible floating signifiers in an integrated complete picture, which also covers the roles of arbitrariness and structure.
