   **Autore** Boas Ralph P (Ralph Philip), <1912-1992>

   **Titolo** A primer of real functions / / Ralph P. Boas [[electronic resource]]

   **Pubbl/distr/stampa** Washington : , : Mathematical Association of America, , 1996

   **ISBN** 1-61444-013-1

   **Edizione** [Fourth edition.]

   **Descrizione fisica** 1 online resource (xiv, 305 pages) : digital, PDF file(s)

   **Collana** The Carus mathematical monographs ; ; no. 13

   **Disciplina** 515/.8

   **Soggetti** Functions of real variables

   **Lingua di pubblicazione** Inglese

   **Formato** Materiale a stampa

   **Livello bibliografico** Monografia

   **Note generali** Title from publisher's bibliographic system (viewed on 02 Oct 2015).

   **Nota di bibliografia** Includes bibliographical references and index.

   **Nota di contenuto** Preface to the fourth edition -- Preface to the third edition -- [ch.] 1. Sets -- 1. Sets -- 2. Sets of real numbers -- 3. Countable and uncountable sets -- 4. Metric spaces -- 5. Open and closed sets -- 6. Dense and nowhere dense sets -- 7. Compactness -- 8. Convergence and completeness -- 9. Nested sets and Baire's theorem -- 10. Some

applications of Baire's theorem -- 11. Sets of measure zero -- [c.h.] 2. Functions -- 12. Functions -- 13. Continuous functions -- 14. Properties of continuous functions -- 15. Upper and lower limits -- 16. Sequences of functions -- 17. Uniform convergence -- 18. Point wise limits on continuous functions -- 19. Approximations to continuous functions -- 20. Linear functions -- 21. Derivaties -- 22. Monotonic functions -- 23. Convex functions -- 24. Infinitely differentiable functions -- [ch.] 3. Integration -- 25. Lebesgue measure -- 26. Measurable functions -- 27. Definition of the Lebesgue integral -- 28. Properties of Lebesgue integrals -- 29. Applications of the Lebesgue integral -- 30. Stieltjes integrals -- 31. Applications of the Stieltjes integral -- 32. Partial sums of infinite series -- Answers to exercises -- Index.

| Sommario/riassunto | This is a revised, updated and significantly augmented edition of a classic Carus Monograph (a bestseller for over 25 years) on the theory of functions of a real variable. Earlier editions of this classic Carus Monograph covered sets, metric spaces, continuous functions, and differentiable functions. The fourth edition adds sections on measurable sets and functions, the Lebesgue and Stieltjes integrals, and applications.   The book retains the informal chatty style of the previous editions, remaining accessible to readers with some mathematical sophistication and a background in calculus. The book is thus suitable either for self-study or for supplemental reading in a course on advanced calculus or real analysis.   Not intended as a systematic treatise, this book has more the character of a sequence of lectures on a variety of interesting topics connected with real functions. Many of these topics are not commonly encountered in undergraduate textbooks: for example, the existence of continuous everywhere-oscillating functions (via the Baire category theorem); the universal chord theorem; two functions having equal derivatives, yet not differing by a constant; and application of Stieltjes integration to the speed of convergence of infinite series. |

| Sommario/riassunto | A major publishing event: the third volume of Michel Leiris's renowned autobiography, now available in English for the first time in a brilliant translation by Lydia Davis A beloved and versatile author and ethnographer, French intellectual Michel Leiris is often ranked in the company of Proust, Gide, Sartre, and Camus, yet his work remains largely unfamiliar to English-language readers. This brilliant translation of Fibrils, the third volume of his monumental autobiographical project The Rules of the Game, invites us to discover why Lévi-Strauss proclaimed him "incontestably one of the greatest writers of the century."   Leiris's autobiographical essay, a thirty-five-year project, is a primary document of the examined life in the twentieth century. In Fibrils, Leiris reconciles literary commitment with social/political engagement. He recounts extensive travel and anthropological work, including a 1955 visit to Mao's China. He also details his suicidal "descent into Hell," when the guilt over an extramarital affair becomes unbearable. A ruthless self-examiner, Leiris seeks to invent a new way of remembering, probe the mechanisms of memory and explore the way a life can be told. |
