Sommario/riassunto

Thirty years have passed since the beginning of the reform era in China which saw important changes in agriculture and rural organizations, but it is clear that certain entrenched legacies from pre-reform China still linger on even after WTO accession, most importantly the key role played by state actors and politics in the development of markets in rural China. Although increasingly diversified markets have emerged for major agricultural inputs and products, their development cannot be understood without taking this role into account. Against this backdrop, the contributors to this b
