Evaluating Interventions

Brief Historical BackgroundConceptual and/or Theoretical Frameworks for Evaluation of Nursing Interventions; Application to CNS Practice; Ethical Considerations; Summary; Discussion Questions; Analysis and Synthesis Exercises; References; Unit III: Promoting Innovation, Change, and Diffusion in Practice; Chapter 8. Using Complex Adaptive Systems Theory to Guide Change; Change Agent; Complex Adaptive Systems; Using CAS Theory to Inform CNS Practice in Managing Change; CAS Theory and Complexity Leadership; The View from here: Preparing for Change; The Business Case; Advanced Nursing Practice

Discussion Questions

| Sommario/riassunto | Now in its second edition, this highly acclaimed text remains the only cohesive, comprehensive textbook and professional reference for CNS education and practice. Supported by theory, research, and current literature, the text focuses on CNS roles and scope of practice, expanding opportunities in primary and home care settings, and on outcomes of CNS practice across the care continuum. This second edition reflects two emerging trends affecting CNS practice: an increased focus on transitional care (continuity across the care setting continuum) and new Centers for Medicare Services reimbursement |
