

1. Record Nr.	UNINA9910809692803321
Autore	Uversky Vladimir N
Titolo	Flexible viruses [[electronic resource]] : structural disorder in viral proteins // edited by Vladimir Uversky, Sonia Longhi
Pubbl/distr/stampa	Hoboken, N.J., : Wiley, c2012
ISBN	1-283-31596-3 9786613315960 1-118-13556-3 1-118-13557-1 1-118-13554-7
Descrizione fisica	1 online resource (534 p.)
Collana	Wiley series in protein and peptide science
Classificazione	SCI007000
Altri autori (Persone)	LonghiSonia
Disciplina	612/.015756
Soggetti	Viral proteins
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	FLEXIBLE VIRUSES; CONTENTS; Preface; Introduction to the Wiley Series on Protein and Peptide Science; Contributors; 1 Do Viral Proteins Possess Unique Features?; 2 Functional Role of Structural Disorder in Capsid Proteins; 3 Structural Disorder Within the Nucleoprotein and Phosphoprotein from Measles, Nipah, and Hendra Viruses; 4 Structural Disorder Within Sendai Virus Nucleoprotein and Phosphoprotein; 5 Structural Disorder in Proteins of the Rhabdoviridae Replication Complex; 6 Structural Disorder in Matrix Proteins of HIV-Related Viruses 7 Structural Disorder in Proteins From Influenza Virus8 Making Order in the Intrinsically Disordered Regions of HIV-1 Vif Protein; 9 Order from Disorder: Structure, Function, and Dynamics of the HIV-1 Transactivator of Transcription; 10 Intrinsically Disordered Domains of Sesbania Mosaic Virus Encoded Proteins; 11 Intrinsic Disorder in Genome-Linked Viral Proteins VPgs of Potyviruses; 12 Intrinsic Disorder in the Human Papillomavirus E7 Protein; 13 The Semliki Forest Virus Capsid Protease is Disordered and Yet Displays Catalytic Activity 14 Core-lations Between Intrinsic Disorder and Multifaceted Activities in Hepatitis C Virus and Related Viruses15 The NS5A Domain II of HCV:

Conservation of Intrinsic Disorder in Several Genotypes; 16
Bacteriophage I N Protein Disorder-Order Transitions Upon Interactions
with RNA or Proteins; 17 N-Terminal Extension Region of Hordeivirus
Movement TGB1 Protein Consists of Two Domains with Different
Content of Disordered Structure; Index

Sommario/riassunto

"This book provides up-to-date information on experimental and computational characterization of the structural and functional properties of viral proteins, which are widely involved in regulatory and signaling processes. With chapters by leading research groups, the book features current information on the structural and functional roles of intrinsic disorders in viral proteomes. It systematically addresses the measles, HIV, influenza, potato virus, forest virus, bovine virus, hepatitis, and rotavirus as well as viral genomics. After analyzing the unique features of each class of viral proteins, future directions for research and disease management are presented"--
