Oeconomicus (the case of trust): Cristiano Castelfranchi; 12. The structured event complex and the human prefrontal cortex: the economic brain: Jordan Grafman; Index

Sommario/riassunto

In recent years the understanding of the cognitive foundations of economic behavior has become increasingly important. This volume contains contributions from such leading scholars as Adam Brandenburger, Michael Bacharach and Patrick Suppes. It will be of great interest to academics and researchers involved in the field of economics and psychology as well as those interested in political economy more generally.
