Sommario/riassunto

The Limits of Maritime Jurisdiction , edited by Clive Schofield, Seokwoo Lee, and Moon-Sang Kwon, comprises 36 chapters by leading oceans scholars and practitioners devoted to both the definition of maritime limits and boundaries spatially and the limits of jurisdictional rights within claimed maritime zones. Contributions address conflicting maritime claims and boundary disputes, access to valuable marine resources, protecting the marine environment, maritime security and combating piracy, concerns over expanding activities and jurisdiction in Polar waters and the impact of climate change on the oceans, including the potential impact of sea level rise on the scope of claims to maritime zones. The volume therefore offers critical analysis on a range of important and frequently increasingly pressing contemporary law of the sea issues.
