

1. Record Nr.	UNINA9910809823603321
Titolo	Proximity and preference : problems in the multidimensional analysis of large data sets // Reginald G. Golledge, John N. Rayner, editors
Pubbl/distr/stampa	Minneapolis, : University of Minnesota Press, c1982
ISBN	0-8166-6865-5 0-8166-6263-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (356 p.)
Altri autori (Persone)	GolledgeReginald G. <1937-> RaynerJohn N
Disciplina	910
Soggetti	Geographical perception Space perception Multidimensional scaling
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Experimental design and measurement problems -- pt. 2. Preference functions and choice behavior -- pt. 3. Special problems.
Sommario/riassunto	How does one design experiments for collecting large volumes of data such as those needed for marketing surveys, studies of travel patterns, and public opinion polls? This is a common problem for social and behavioral scientists. The papers in this collection address the problems of working with large data sets primarily from the perspectives of geography and psychology, two fields that share a common quantitative research methodology. After an introductory paper on substantive and methodological aspects of the interface between geography and psychology, the book is divided into three sections
