Sommario/riassunto	""Gastroesophageal cancers are the most common form of cancer incidents, and the second most common cause of death among cancer patients. In 2000, it was estimated that over one million new cases of gastroesophageal cancers were diagnosed worldwide, and over 900,000 individuals died from the disease.Using a multi-disciplinary approach, Esophageal Cancer: Principles and Practice addresses the complexities encountered in the understanding and management of esophageal cancers. Written by the worlds leading experts in surgery, medical oncology, radiation oncology, gastroenterology, pathology, radi
