Sommario/riassunto	"In this highly controversial and original work, Damien Short systematically rethinks how genocide is and should be defined. Rather than focusing solely on a narrow conception of genocide as direct mass-killing, through close empirical analysis of a number of under- discussed case studies - including Palestine, Sri Lanka, Australia and Alberta, Canada - the book reveals the key role played by settler colonialism, capitalism, finite resources and the ecological crisis in driving genocidal social death on a global scale."--Publisher's website.
