

1. Record Nr.	UNINA9910810019303321
Autore	Harris James A., Sr.
Titolo	Economic growth and the nanotechnology priority : the challenge of economic crisis and industrial concentration / / James A. Harris Sr
Pubbl/distr/stampa	Lanham, Maryland : , : Lexington Books, , 2014 ©2014
ISBN	0-7391-9999-4
Descrizione fisica	1 online resource (171 p.)
Disciplina	338.4/76205
Soggetti	Financial crises Industrial concentration Nanotechnology Economic development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Ch01. Essence of Economic Growth-Based Nanotechnology Innovation Worldwide; Ch02. Definitions and Concepts of Global Over-the-Counter Derivatives Accumulation Crises; Ch03. Grand Tying Arrangements and Reciprocal Dealings (Reciprocity); Ch04. Global Over-the-Counter (OTC) Derivatives Accumulation; Ch05. The Financial Crisis, Corporations, Concentration of Control and Market Power; Ch06. Catastrophic and Calamity Consequences; Bibliography; Index; About the Author
Sommario/riassunto	Economic Growth and the Nanotechnology Priority: The Challenge of Economic Crisis and Industrial Concentration argues that the nanometer scale would revolutionize and advance sources of economic growth to its highest and best use in history.
