Sommario/riassunto	In the half-century before Poland's long-awaited political independence in 1918, anxiety surrounding the country's burgeoning sex industry fueled nearly constant public debate. The Devil's Chain is the first book to examine the world of commercial sex throughout the partitioned Polish territories, uncovering a previously hidden conversation about sexuality, gender propriety, and social class. Keely Stauter-Halsted situates the preoccupation with prostitution in the context of Poland's

struggle for political independence and its difficult transition to modernity. She traces the Poles' growing anxiety about white slavery, venereal disease, and eugenics by examining the regulation of the female body, the rise of medical authority, and the role of social reformers in addressing the problem of paid sex. Stauter-Halsted argues that the sale of sex was positioned at the juncture of mass and elite cultures, affecting nearly every aspect of urban life and bringing together sharply divergent social classes in what had long been a radically stratified society. She captures the experiences of the impoverished women who turned to the streets and draws a vivid picture of the social milieu that shaped their choices. The Devil's Chain demonstrates that discussions of prostitution and its attendant disorders-sexual deviancy, alcoholism, child abuse, vagrancy, and other related problems-reflected differing visions for the future of the Polish nation.

## Sommario/riassunto

The book continues to use quantitative and empirical research methods to summarize and analyze the achievements of government openness in China in 2020. It points out that in 2020, the exploration of standardization and standardization of government affairs openness is accelerating, decision-making openness is making steady progress, and government affairs services, administrative law enforcement, and management results are all making significant progress. However, in the future, it is still necessary to further enhance the awareness of openness, identify the needs of the public, integrate openness into the whole process of government affairs activities, and improve the level of information security. Besides, the book for the first time first carries out a third-party assessment of the government affairs publicity in the national free trade zones and free trade zones, and releases research reports on the publicity of administrative punishment information, government news release, work and production resumption information, and health science popularization information.
