Autore	OECD
Titolo	Fostering Water Resilience in Brazil
Pubbl/distr/stampa	Paris : , : Organization for Economic Cooperation & Development, , 2022 ©2022
ISBN	92-64-54375-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (115 pages)
Collana	OECD studies on water
Disciplina	363.610981
Soggetti	Water-supply - Brazil
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Governing water infrastructure for greater resilience -- Foreword -- Strengthening multi-level governance and the use of economic instruments in the Pianco-Piranhas Acu River Basin -- Executive summary -- List of stakeholders consulted during the workshops -- Making water and sanitation regulation in Brazil more effective -- Preface.
Sommario/riassunto	Brazil made significant progress in managing water resources since the adoption of the National Water Law in 1997 and the creation of the National Water and Sanitation Agency (ANA) in 2000. Nevertheless, water security challenges persist and will be aggravated by megatrends such as climate change, population growth, urbanisation, and the economic, social and environmental consequences of the COVID-19 pandemic.
