Sommario/riassunto	Byzantium's Balkan Frontier is the first narrative history in English of the northern Balkans in the tenth to twelfth centuries. Where previous histories have been concerned principally with the medieval history of distinct and autonomous Balkan nations, this study regards Byzantine

political authority as a unifying factor in the various lands which formed the empire's frontier in the north and west. It takes as its central concern Byzantine relations with all Slavic and non-Slavic peoples - including the Serbs, Croats, Bulgarians and Hungarians - in and beyond the Balkan Peninsula, and explores in detail imperial responses, first to the migrations of nomadic peoples, and subsequently to the expansion of Latin Christendom. It also examines the changing conception of the frontier in Byzantine thought and literature through the middle Byzantine period.
