Sommario/riassunto	The ""Washington consensus"" which ushered in neo-liberal policies in Africa is over. It was buried at the G20 meeting in London in early April, 2009. The world capitalist system is in shambles. The champions of

capitalism in the global North are rewriting the rules of the game to save it. The crisis creates an opening for the global South, in particular Africa, to refuse to play the capitalist-imperialist game, whatever the rules. It is time to rethink and revisit the development direction and strategies on the continent. This is the central message of this intensely argued book. Issa Shivji
