Pubbl/distr/stampa	New York : , : Palgrave Macmillan US : , : Imprint : Palgrave Macmillan, , 2005
ISBN	1-4039-6509-9 9786611364502 1-281-36450-9
Edizione	[1st ed. 2005.]
Descrizione fisica	1 online resource (IX, 278 p. 2 illus.)
Altri autori (Persone)	BulkeleyKelly <1962->
Disciplina	612.8/233
Soggetti	Neurosciences Philosophy of mind Neuropsychology Personality Difference (Psychology) Religion - Philosophy Science - Philosophy Neuroscience Philosophy of Mind Personality and Differential Psychology Philosophy of Religion Philosophy of Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Genes, brains, minds: the human complex / Holmes Rolston III -- Brain, mind, and spirit--a clinician's perspective, of why I am not afraid of dualism / James W. Jones -- Psychoneurological dimensions of anomalous experience in relation to religious belief and spiritual practice / Stanley Krippner -- Sacred emotions / Robert A. Emmons -- Where neurocognition meets the master: attention and metacognition in Zen / Tracey L. Kahan and Patricia M. Simone -- From chaos to self-organization: the brain, dreaming, and religious experience / David

Kahn -- Converting: toward a cognitive theory of religious change / Patricia M. Davis and Lewis R. Rambo -- Cognitive science and Christian theology / Charlene P.E. Burns -- Overcoming an impoverished ontology: Candrakirti and the mind-brain problem / Richard K. Payne -- Religion and brain-mind science: dreaming the future / Kelly Bulkeley -- Religion out of mind: the ideology of cognitive science and religion / Jeremy Carrette -- Brain science on ethics: the neurobiology of making choices / Walter J. Freeman.

Sommario/riassunto

Soul, Psyche, Brain is a collection of essays that address the relationships between neuroscience, religion and human nature. Kelly Bulkeley's book highlights some startling new developments in neuroscience that have many people rethinking spirituality, the mind-body connection, and cognition in general. Soul, Psyche, Brain explores questions like: what can knowledge about the neurological activities of the brain tell us about consciousness? And what are the practical implications of brain-mind science for ethics and moral reasoning?
