Sommario/riassunto	In discussions of the origin of the Pentateuch, the Priestly source traditionally constitutes an undisputed reference point for different source-critical models, and it is the only literary layer with concise terminology and a theological conception that can be extracted from a non-Priestly context. This English translation of <i>Abschied von der Priesterschrift? Zum Stand der Pentateuchdebatte</i> revisits the scholarly debate surrounding the Documentary Hypothesis and the so-called Priestly material's position either as an independent written source or as a redaction within the books of Genesis through Deuteronomy. Contributors include Christoph Berner, Erhard Blum, Jan Christian
