

1. Record Nr.	UNINA9910810469003321
Autore	Nguyen Nam-Trung <1970->
Titolo	Fundamentals and applications of microfluidics [[electronic resource] /] / Nam-Trung Nguyen, Steven T. Wereley
Pubbl/distr/stampa	Boston, MA, : Artech House, c2002
ISBN	1-58053-805-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (482 p.)
Collana	MEMS--Microelectromechanical systems series
Altri autori (Persone)	Wereley Steven T
Disciplina	620.1/06
Soggetti	Fluidic devices Micromechanics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preliminaries; Contents; Preface; Acknowledgments; Chapter 1 Introduction; Chapter 2 Fluid Mechanics Theory; Chapter 3 Fabrication Techniques for Microfluidics; Chapter 4 Experimental Flow Characterization; Chapter 5 Microfluidics for External Flow Control; Chapter 6 Microfluidics for Internal Flow Control Microvalves; Chapter 7 Microfluidics for Internal Flow Control Micropumps; Chapter 8 Microfluidics for Internal Flow Control Microflow Sensors; Chapter 9 Microfluidics for Life Sciences and Chemistry; Appendix A List of Symbols; Appendix B Resources for Microfluidics Research Appendix C Abbreviations of Different Plastics Appendix D Linear Elastic Deflection Models; About the Authors; Index
Sommario/riassunto	Look to this authoritative, new resource for a comprehensive introduction to the emerging field of microfluidics. The book shows you how to take advantage of the performance benefits of microfluidics and serves as your instant reference for state-of-the-art technology and applications in this cutting-edge area. It offers you practical guidance in choosing the best fabrication and enabling technology for a specific microfluidic application, and shows you how to design a microfluidic device.
