

1. Record Nr.	UNINA9910810499403321
Titolo	Catalytic cascade reactions // edited by Peng-Fei Xu, State Key Laboratory of Applied Organic Chemistry, College of Chemistry and Chemical Engineering, Lanzhou University, Lanzhou, P.R. China, Wei Wang, Department of Chemistry and Chemical Biology, University of New Mexico, Albuquerque, New Mexico
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , [2014] ©2014
ISBN	1-118-35665-9 1-118-35663-2 1-118-35664-0
Descrizione fisica	1 online resource (446 pages) : illustrations
Classificazione	SCI013040
Altri autori (Persone)	XuPeng-Fei <1964-> WangWei (Associate professor of chemistry)
Disciplina	547/.215
Soggetti	Organic reaction mechanisms Catalysis Chemical reactions Organic compounds - Synthesis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"The development of catalytic versions of cascade reactions has become one of the most active and burgeoning reaction areas in organic synthesis. Covering both organocatalysis and transition-metal catalysis for these reactions, Catalytic Cascade Reactions illustrates the versatility and application of cascade reactions for synthesizing valuable compounds, such as drugs and natural products. Highlighting catalytic versus non-catalytic reactions, an important shift in academic and industry practice, the text brings chemists and the organic synthesis community up to speed on the many recent advances in the field"--
