

1. Record Nr.	UNINA9910810516303321
Titolo	Threatened species [[electronic resource] /] / edited by Justin Healey
Pubbl/distr/stampa	Thirroul, N.S.W., : Spinney Press, 2013
ISBN	1-922084-24-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (60 pages) : colour illustrations
Collana	Issues in society ; ; v. 362
Altri autori (Persone)	HealeyJustin
Disciplina	578.68
Soggetti	Endangered species - Australia Endangered species - Law and legislation - Australia Biodiversity conservation - Law and legislation - Australia Biodiversity conservation - Australia Environmental law - Australia
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1. The global extinction crisis -- Chapter 2. Threatened species in Australia -- Chapter 3. Biodiversity conservation in Australia.
Sommario/riassunto	The health of the world's biodiversity is under considerable threat, and Australia is no exception, with more than 2,000 Australian species featuring on the latest annual Red List of Threatened Species. Twenty per cent of Australia's wildlife is now classified as threatened. Australia's biodiversity is unique and globally significant. Australia is home to many endemic species of plants and animals which are under increasing threat from multiple fronts, including habitat degradation from human activity, native vegetation clearance, deterioration of water and soil quality, increased dryland salinity, the spread of feral pests and weeds, and climate change. This book examines the global rate of species extinction, and explains the importance of biodiversity conservation. What are Australia's most endangered species? What legal and practical measures is Australia taking to conserve its threatened species? Is the planet on the brink of an extinction crisis?
