Sommario/riassunto	Brill's Companion to Aineias Tacticus is a collection of articles on the significance of the earliest Greek handbook on military tactics. Aineias'

(Aeneas) wrote his *Poliorketika* in the mid-fourth century BC, offering a unique perspective on contemporary Greek city-states, warfare and intellectual trends. We offer an introduction to Aineias and his work, and then discuss the work's historical and intellectual context, his qualities as a writer, and aspects of his work as a historical source for the Greek polis of the fourth century BC. Several chapters discuss Aineias' approach to warfare, specifically light infantry, mercenaries, naval operations, fortifications and technology. Finally, we include a lengthy study of the reception of ancient military treatises, specifically Aineias' *Poliorketika*, in the Byzantine period.
