Sommario/riassunto	Enhancing Job Opportunities: Eastern Europe and the Former Soviet Union addresses why labor market outcomes have been disappointing during the transition and suggests policy interventions that can foster job creation and reduce unemployment. In many countries in the Region, productive job opportunities are scarce, despite the resurgence of economic growth. The book argues that the primary cause of this outcome is defensive enterprise restructuring-enterprises are improving productivity largely by shedding redundant labor. For the creation of more and better jobs, enterprises should move toward
