1.	Record Nr.	UNINA9910810544003321
	Titolo	Beyond 'Any' and 'Ever' : new explorations in negative polarity sensitivity / / edited by Regine Eckardt [and three others]
	Pubbl/distr/stampa	Berlin : , : De Gruyter, , [2013] ©2013
	ISBN	3-11-030523-2
	Descrizione fisica	1 online resource (376 p.)
	Collana	Trends in Linguistics. Studies and Monographs [TiLSM]
	Altri autori (Persone)	EckardtRegine
	Disciplina	415
	Soggetti	Context (Linguistics) Grammar, Comparative and general - Negatives Polarity (Linguistics)
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di contenuto	Front matter -- Contents -- Acknowledgements -- Beyond "any" and "ever" / Eckardt, Regine / Sailer, Manfred -- Mapping the West Germanic any's / Auwera, Johan van der / Van Alsenoy, Lauren -- Polarity items in Strawsonian contexts - A comparison / Hoeksema, Jack -- From æghwæðer to either: The distribution of a negative polarity item in historical perspective / Gast, Volker -- Evaluability - An alternative approach to polarity sensitivity / Brandtler, Johan -- How to get even with desires and imperatives / Crni, Luka -- On NPI licensing in possibility conditionals / Hsieh, I-Ta Chris -- An analogy between a connected exceptive phrase and polarity items / Gajewski, Jon -- The chance of being an NPI / Herburger, Elena / Mauck, Simon -- The modal need VP gap (non)anomaly / Levine, Robert -- Minimizers - Towards pragmatic licensing / Eckardt, Regine / Csipak, Eva -- Revisiting the licensing problem through understating NPIs - The Case of Japanese anmari '(not) very/much' / Matsui, Ai -- Really all that clear? / Onea, Edgar / Sailer, Manfred -- Polarity in context / Liu, Mingya / Eckardt, Regine / Radó, Janina -- Index
	Sommario/riassunto	The grammar of negative polarity items is one of the challengesfor linguistic theory. NPIs cross-cut all traditional categories in grammar and semantics, yet their distribution is by no means arbitrary. Theories

of NPI licensing have been proposed in terms of syntax, semantics, and pragmatics - each with its own merits and problems. The volume comprises state-of-the-art studies and suggests an interpolation approach to NPI licensing.
