Note generali	Includes index.
Nota di contenuto	Front Matter -- Contents -- Foreword -- Preface -- Introduction -- A Brief Survey of the Major Topics -- The Bibliography -- Subject Index -- Books -- Theses -- Three Centres with Major Collections
Sommario/riassunto	Research into various aspects of the Holocaust has escalated in recent years just as the ranks of survivor-subjects are rapidly diminishing. All documents contributing in any way to the knowledge of psychological and medical consequences have been included in this bibliography. Materials are drawn from psychological, psychiatric, and social work literature and from personal accounts. In addition to printed books and articles, references are made to manuscripts which are housed at one of the three centres where major libraries of this kind exist. The bibliography contains titles in English, French, Polish, Dutch, and German, as well as a number of other languages. The major topics are: 1. Direct observations of, and direct reactions to, the concentration camp during imprisonment and immediately after liberation. 2. Compensation and rehabilitation. 3. Physical and psychological results.
