

1. Record Nr.	UNINA9910810698603321
Autore	Reeves Eileen Adair
Titolo	Evening news : optics, astronomy, and journalism in early modern Europe / / Eileen Reeves
Pubbl/distr/stampa	Philadelphia : , : University of Pennsylvania Press, , [2014] ©2014
ISBN	0-8122-0948-6
Edizione	[First edition.]
Descrizione fisica	1 online resource (315 pages)
Collana	Material texts
Disciplina	070.9/032
Soggetti	Journalism - Europe - History - 17th century Newspaper publishing - Effect of technological innovations on - Europe - History - 17th century Optics - Social aspects - Europe - History - 17th century Astronomy - Social aspects - Europe - History - 17th century Europe Intellectual life 17th century
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front matter -- Contents -- Introduction -- Chapter 1. Jesuits on the Moon -- Chapter 2. Medici Stars and the Medici Regency -- Chapter 3. Galileo Gazzettante -- Chapter 4. Cameras That Don't Lie -- Chapter 5. Cameras That Do -- Chapter 6. Rapid Transport -- Conclusion -- Notes -- Bibliography -- Index -- Acknowledgments
Sommario/riassunto	Eileen Reeves examines a web of connections between journalism, optics, and astronomy in early modern Europe, devoting particular attention to the ways in which a long-standing association of reportage with covert surveillance and astrological prediction was altered by the near simultaneous emergence of weekly newsheets, the invention of the Dutch telescope, and the appearance of Galileo Galilei's astronomical treatise, <i>The Starry Messenger</i> . Early modern news writers and consumers often understood journalistic texts in terms of recent developments in optics and astronomy, Reeves demonstrates, even as many of the first discussions of telescopic phenomena such as planetary satellites, lunar craters, sunspots, and comets were conditioned by accounts of current events. She charts how the

deployment of particular technologies of vision—the telescope and the camera obscura—were adapted to comply with evolving notions of objectivity, censorship, and civic awareness. Detailing the differences between various types of printed and manuscript news and the importance of regional, national, and religious distinctions, *Evening News* emphasizes the ways in which information moved between high and low genres and across geographical and confessional boundaries in the first decades of the seventeenth century.
