

1. Record Nr.	UNINA9910810712203321
Autore	Rhodes Holly Greenwood
Titolo	Measuring the risks and causes of premature death : summary of workshops // National Research Council and Institute of Medicine of the National Academies ; Holly G. Rhodes, rapporteur
Pubbl/distr/stampa	Washington, District of Columbia : , : The National Academies Press, , 2015 ©2015
ISBN	0-309-36709-3 0-309-36707-7
Descrizione fisica	1 online resource (74 pages) : color illustrations, graphs
Disciplina	304.645072
Soggetti	Life expectancy - United States Premature death - United States Premature death
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	"Measuring the Risks and Causes of Premature Death is the summary of two workshops conducted by The Committee on Population of the National Research Council at the National Academies to address the data sources, science and future research needs to understand the causes of premature mortality in the United States. The workshops reviewed previous work in the field in light of new data generated as part of the work of the NRC Panel on Understanding Divergent Trends in Longevity in High-Income Countries (NRC, 2011) and the NRC/IOM Panel on Understanding Cross-National Differences Among High-Income Countries (NRC/IOM, 2013). The workshop presentations considered the state of the science of measuring the determinants of the causes of premature death, assessed the availability and quality of data sources, and charted future courses of action to improve the understanding of the causes of premature death. Presenters shared their approaches to and results of measuring premature mortality and specific risk factors, with a particular focus on those factors most

amenable to improvement through public health policy. This report summarizes the presentations and discussion of both workshops." --
