

1. Record Nr.	UNINA9910810739103321
Autore	Sasaki Clarence T.
Titolo	Laryngeal physiology for surgeons // Clarence T. Sasaki
Pubbl/distr/stampa	San Diego : , : Plural Publishing, , [2007] ©2007
ISBN	1-59756-760-4
Descrizione fisica	1 online resource (113 p.)
Disciplina	612.2
Soggetti	Larynx - Physiology Larynx - Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Phylogeny and function -- Structure and function -- Innervation of the larynx -- Neurophysiology of protective function -- Neurophysiology of respiratory function -- Phonatory function -- Tracheotomy and laryngeal function -- Laryngeal paralysis -- Glossary of commonly used electrophysiological terms.
Sommario/riassunto	This book enables a sound understanding of the three principal functional priorities of the larynx: protection, respiration, and phonation. It explores these three functional categories in terms of phylogeny, functional morphology, and neuromuscular reflexes. The book features numerous illustrations and tables and most chapters are preceded by focused case presentations introducing relevant clinical descriptions.
