Sommario/riassunto	Accessible yet authoritative biography of the colorful character who instigated the Protestant Reformation Martin Luther, the Augustinian friar who set the Protestant Reformation in motion with his famous Ninety-Five Theses, was a man of extremes on many fronts. He was both hated and honored, both reviled as a heretic and lauded as a kind of second Christ. He was both a quiet, solitary reader and interpreter of the Bible and the first media-star of history, using the printing press to reach many of his contemporaries and become the most-read theologian of the sixteenth century. Thomas Kaufmann's concise biography highlights the two conflicting "natures" of Martin Luther, depicting Luther's earthiness as well as his soaring theological contributions, his flaws as well as his greatness. Exploring the close correlation between Luther's Reformation theology and his historical context, A Short Life of Martin Luther serves as an ideal introduction to the life and thought of the most important figure in the Protestant Reformation.

Sommario/riassunto

Neither rational choice theory, with its emphasis on interest calculation, nor sociological institutionalist theory, with its emphasis on identity-defined rule following, indicates how governments determine which of their multiple interests or identities are at stake in a particular situation or how they develop mutual comprehension of each other's goals. International Regimes for the Final Frontier addresses these gaps by tracing how governments approach an unfamiliar issue—in this case, international agreements regulating human activity in outer space between 1958 and 1988—and examines three ways situation definitions channel governments' approaches to issues or problems.
