Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cell shape and the cell morphogenesis -- Cell migration -- Epithelial morphogenesis -- Morphogenesis by cell proliferation and death.
Sommario/riassunto	Morphogenesis is the set of processes that generate shape and form in the embryo- an important area within developmental biology. An exciting and up to the minute account of the very latest research into the factors that create biological form, Mechanisms of Morphogenesis is a text reference on the mechanisms of cell and tissue morphogenesis in a diverse array of organisms including prokaryotes, animals, plants and fungi. By combining hard data with computer modelling, this book will equip readers with a much broader understanding of the scope of modern research than is otherwis
