Sommario/riassunto

With more and more nonprofit employees responsible for the creation and management of the annual budget, it's clear that budgets must be well designed and easy to implement in order to accommodate the trend toward decentralizing decision-making powers in nonprofit organizations. Continuous budgeting, as explained in Not-for-Profit Budgeting and Financial Management, Fourth Edition offers a system that is not only easy to use and monitor, but also ensures true fiscal accountability in the complex nonprofit arena.--Provided by publisher.
