

1. Record Nr.	UNINA9910810903103321
Autore	Viikari Lotta
Titolo	The environmental element in space law : assessing the present and charting the future // by Lotta Viikari
Pubbl/distr/stampa	Leiden ; ; Boston, : Martinus Nijhoff Publishers, 2008
ISBN	1-282-60188-1 9786612601880 90-474-3355-6 978-90-47-43355-2 978-90-04-16744-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (412 p.)
Collana	Studies in space law, , 1871-7659 ; ; v. 3
Disciplina	341.4/7
Soggetti	Space law - Finland Aeronautics - Environmental aspects - Finland
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Revision of the author's thesis (doctoral), 2007.
Nota di bibliografia	Includes bibliographical references (p. 325-358) and index.
Nota di contenuto	Environmental problems related to space activities -- Space law from an environmental perspective -- International environmental law in the space sector -- From general principles to practicable rules.
Sommario/riassunto	While decades of space ventures have led to significant technological advances, space activities have also brought increasing environmental problems. This book examines the current international legal regimes in space law and environmental law in order to ascertain their applicability and efficacy in addressing environmental threats in the space sector. The research suggests mechanisms which could improve environmental protection in the sector and strengthen the environmental element in space law. These mechanisms include a variety of norm-setting strategies used in international environmental management. Special attention is drawn to the potential of environmental impact assessment in the space sector and to dispute resolution procedures. Like other areas of human activities, the space sector should accommodate both economic interests and environmental protection in line with the principle of sustainable development
