## Sommario/riassunto

IBM Workplace Services Express is software that makes it easy for you, your colleagues, your teams, and your entire organization to quickly collaborate and effectively work together. Designed specifically for small and medium-sized organizations with less than a thousand employees, or departmental needs in larger organizations, Workplace Services Express enables you to easily create, edit, and share documents from your own customized Workplace environment. This IBM Redbooks publication will introduce you to Workplace Services Express and its features and tell you how to deploy and customize it. Whether you are a line-of-business manager who wants to understand the business value of Workplace Services Express, an administrator who wants to install it, or an application developer who wants to customize it, this book is for you. Please note that the additional material referenced in the text is not available from IBM.
