

1. Record Nr.	UNINA9910810974903321
Autore	Kenney Keith R (Keith Raymond)
Titolo	Visual communication research designs // Keith Kenney
Pubbl/distr/stampa	New York : , : Routledge, , 2009
ISBN	1-281-93122-5 0-203-93101-7 9786611931223 1-135-85927-2 1-135-85926-4
Edizione	[1st ed.]
Descrizione fisica	xvii, 289 p. : ill
Classificazione	05.38
Disciplina	302.2/22
Soggetti	Research - Methodology Visual communication - Research Visual communication
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. [267]-283) and index.
Nota di contenuto	Like an espresso but without the insomnia -- Putting your best "cyberface" forward -- I don't want to talk about it; I want to draw it! -- Reach out and hug someone -- We shall act and overcome, together -- Working for two universities 5,000 miles apart -- Traditions are group efforts to prevent the unexpected -- That story's ridiculous; look, here's what happened -- Everything you wanted to know, but were powerless to ask / David Weintraub -- Sex on TV : a content interpretive analysis.
Sommario/riassunto	Visual Communication Research Designs provides a step-by-step guide for designing research involving visuals relevant to communications media. This volume explains the process from conceptualization to research questions, instrumentation, analysis, and reliability and validity checks. It also addresses the lack of sufficient methods to answer theoretical questions attending visual communication. This resource has been developed in response to the circumstance in which, in many cases, the methodologies used for verbal and textual communications are inappropriate or ineffective when applied or adapted for the study of visual communications. Additionally, research

articles from ethnography, action research, rhetoric, semiotics, psychology, cultural studies, and critical theory often do not use examples appropriate to visual communication readers. To address these issues, this book explains in clear and straightforward language key research designs, including new methodologies, that are appropriate for scholars and students conducting visual communication research. Organized into three parts -- production, analysis, and effects of visuals - this research text provides guidance in using, interpreting and measuring the effects of visual images. It addresses such topics as: producing photographs and video that can be used as research data; interpreting images that already exist; measuring the effects of visuals and to understand their use by different groups. Ethical issues are included, as well as a discussion of the advantages and limitations of each method. "War stories" are provided by experienced researchers, who discuss a particular research project and explain pitfalls to avoid, as well as what to do when problems occur. The primary audiences are scholars, researchers, and students conducting research on motion pictures, video, television, photographs, illustrations, graphics, typography, political cartoons, comic books, animation, and other media with a visual component. Individuals will use this text whenever they need to conduct research that involves visuals in the media. The book will be a required text for advanced courses in visual culture, seminars on visual communication research, and other research methods courses integrating a visual component.
