Sommario/riassunto	"Culture Matters is the summary of a workshop convened by the Government-University-Industry Research Roundtable (GUIRR) in July 2013 to address how culture and cultural perception influence and impact the process by which research agreements are made and negotiated across international boundaries. In this workshop, "Culture Matters: An Approach to International Research Agreements", representatives from around the world and from GUIRR's three constituent sectors - government, university, and industry - gathered to provide input into four specific meeting tracks or domains. The tracks focused on research and agreements affecting or involving people/human subjects; environmental and natural resources; science, engineering, and manufacturing; and agriculture and animal issues. This report examines each of these domains and the role that culture and cultural expectations may have in the forging and implementation of international research agreements."--
