

1. Record Nr.	UNINA9910811026303321
Autore	Lovelock James <1919-2022.>
Titolo	Gaia [[electronic resource]] : A New Look at Life on Earth
Pubbl/distr/stampa	Oxford, : OUP Oxford, 2000
Descrizione fisica	1 online resource (169 p.)
Disciplina	333.72 577
Soggetti	Biology -- Philosophy Biosphere Gaia hypothesis Biosphere - Philosophy Biology Health & Biological Sciences Biology - General
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Cover; Contents; Preface; 1 Introductory; 2 In the beginning; 3 The recognition of Gaia; 4 Cybernetics; 5 The contemporary atmosphere; 6 The sea; 7 Gaia and Man: the problem of pollution; 8 Living within Gaia; 9 Epilogue; Definitions and explanations of terms; Further reading
Sommario/riassunto	In this classic work that continues to inspire its many readers, Jim Lovelock puts forward his idea that life on earth functions as a single organism. Written for non-scientists, Gaia is a journey through time and space in search of evidence with which to support a new and radically different model of our planet. In contrast to conventional belief that living matter is passive in the face of threats to its existence, the book explores the hypothesis that the earth's livingmatter air, ocean, and land surfaces forms a complex system that has the capacity to keep the Earth a fit place for life.
