

1. Record Nr.	UNINA9910811262103321
Autore	Beyrer Chris
Titolo	The global HIV epidemics among men who have sex with men // Chris Beyrer ... [and others]
Pubbl/distr/stampa	Washington, D.C. : , : World Bank, , c2011
ISBN	1-283-13428-4 9786613134288 0-8213-8727-8
Descrizione fisica	xlvi, 350 pages : illustrations ; ; 23 cm
Collana	Directions in development. Human development
Altri autori (Persone)	BeyrerChris
Disciplina	362.196/97920086642
Soggetti	HIV infections Male homosexuality World health
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction to the epidemic scenarios -- Scenario 1 country studies : Brazil and Peru -- Scenario 2 country studies : Russian Federation and Ukraine -- Scenario 3 country studies : Kenya, Malawi, and Senegal -- Scenario 4 country studies : India and Thailand -- Middle East and North Africa -- Combination HIV prevention interventions for MSM : an umbrella review of the evidence and recommendations -- Modeling MSM populations, HIV transmission, and intervention impact -- Modeling cost and cost-effectiveness -- Policy and human rights.
Sommario/riassunto	This report explores the emerging epidemics of HIV among men who have sex with men (MSM) in low and middle income countries (LMIC). A case study approach is used to explore these epidemics in detail in Peru, Ukraine, Kenya, and Thailand. Systematic reviews of epidemiology and prevention science were used to understand these epidemics, and to assess the evidence for interventions in prevention, access to care and treatment, and human rights protections. The Goals model was then used to assess the potential impact at country level of responding to epidemics among MSM. Benefits were seen for over
