Sommario/riassunto	The volume consists of papers prepared for the International Symposium of Chadic Linguistics (Boulder, Colorado, May 1-2, 1987). Although the papers are representative of the current work being done in the field of Chadic linguistics, they also reflect the current and past interests and methodologies of general linguistics. The papers included in the volume should therefore be of interest to a general linguist as much as to the Chadicist or a specialist in some other Afroasiatic branch. The papers are grouped by the areas of linguistic fields and methodologies.
