

1. Record Nr.	UNINA9910811393703321
Autore	Miller Char <1951->
Titolo	Seeking the greatest good : the conservation legacy of Gifford Pinchot / Char Miller
Pubbl/distr/stampa	Pittsburgh, Pennsylvania : , : University of Pittsburgh Press, , 2013 ©2013
ISBN	0-8229-7921-7
Descrizione fisica	1 online resource (234 pages)
Classificazione	HIS036060SCI026000
Disciplina	333.72
Soggetti	Environmental policy - United States - History Nature conservation - United States - History Forest conservation - United States - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	[1] A Living Memorial -- This Old House -- September 24, 1963 -- Home Grounds -- The Inseparable World -- Under Fire -- Greening the Presidency -- [2] Institutional Change -- Conservation Education -- Branching Out -- Turning the White Elephant Gold -- Neutral Force -- Common Cause -- Looking Forward.
Sommario/riassunto	"President John F. Kennedy officially dedicated the Pinchot Institute for Conservation on September 24, 1963 to further the legacy and activism of conservationist Gifford Pinchot (1865-1946). Pinchot was the first chief of the United States Forest Service, appointed by Theodore Roosevelt in 1905. During his five-year term, he more than tripled the national forest reserves to 172 million acres. A pioneer in his field, Pinchot is widely regarded as one of the architects of American conservation and an adamant steward of natural resources for future generations. Author Char Miller highlights many of the important contributions of the Pinchot Institute through its first fifty years of operation. As a union of the United States Forest Service and the Conservation Foundation, a private New York-based think tank, the institute was created to formulate policy and develop conservation education programs. Miller chronicles the institution's founding, a donation of the Pinchot family, at its Grey Towers estate in Milford,

Pennsylvania. He views the contributions of Pinchot family members, from the institute's initial conception by Pinchot's son, Gifford Bryce Pinchot, through the family's ongoing participation in current conservation programming. Miller describes the institute's unique fusion of policymakers, scientists, politicians, and activists to increase our understanding of and responses to urban and rural forestry, water quality, soil erosion, air pollution, endangered species, land management and planning, and hydraulic fracking. Miller explores such innovative programs as Common Waters, which works to protect the local Delaware River Basin as a drinking water source for millions; EcoMadera, which trains the residents of Cristobal Colon in Ecuador in conservation land management and sustainable wood processing; and the Forest Health-Human Health Initiative, which offers health-care credits to rural American landowners who maintain their carbon-capturing forestlands. Many of these individuals are age sixty-five or older and face daunting medical expenses that may force them to sell their land for timber. Through these and countless other collaborative endeavors, the Pinchot Institute has continued to advance its namesake's ambition to protect ecosystems for future generations and provide vital environmental services in an age of a burgeoning population and a disruptive climate"--
