Sommario/riassunto	The assessment and treatment of mental health concerns for Deaf individuals has been largely ignored and/or misunderstood by many mental health professionals. In Mental Health and Deafness, Margaret du Feu and Cathy Chovaz seek to rectify this by outlining current issues surrounding mental health and deafness. The book provides valuable information to professionals interested in expanding their knowledge of mental health and deafness, and the authors share their extensive clinical experience with the reader through a variety of case studies. The authors primarily focus on individuals who were
