1. Record Nr.   UNINA9910811524003321

   Titolo   Higher homotopy structures in topology and mathematical physics :
                       proceedings of an international conference June 13-15, 1996 at Vassar
                       College, Poughkeepsie, New York, to honor the sixtieth birthday of Jim
                       Stasheff / / John McCleary, editor

   Pubbl/distr/stampa Providence, Rhode Island : , : American Mathematical Society, , [1999]
                       ©1999

   ISBN   0-8218-7818-2

   Descrizione fisica 1 online resource (338 p.)

   Collana   Contemporary mathematics, ; 227 , 0271-4132

   Disciplina   514/.24

   Soggetti   Homotopy theory
                       Topology
                       Mathematical physics

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia   Includes bibliographical references.

   Nota di contenuto   Contents -- Preface -- Invited addresses -- Contributed papers --
                       Participants -- An appreciation of the work of Jim Stasheff -- The
                       cohomology flat product and the Berstein algebra of a co-H-space --
                       Spaces of local vector fields -- Operads from the viewpoint of
                       categorical algebra -- Double loop spaces, braided monoidal
                       categories and algebraic 3-type of space -- Poisson brackets with
                       divergence terms in field theories: Three examples -- Grassmanian
                       and elliptic operators -- On the deformation of rings and algebras V:
                       Deformation of differential graded algebras -- On p-minimal
                       homological models of twisted tensor products of elementary
                       complexes localised over a prime -- Stability of the rational homotopy
                       type of moduli spaces.
