Sommario/riassunto	This book describes contemporary perspectives on the identity development of college students in the U.S. with an emphasis on multiple social identities. The book traces the evolution of the study of identity in relation to contemporary research and theoretical frameworks. These contemporary perspectives are situated within a holistic description of identity that portrays identity as the intersection of context, personal characteristics, and social identities. It explores the nature of context, including inequitable power structures, and how

context influences and is influenced by multiple
