| Sommario/riassunto      | Das Buch untersucht die mythischen Traditionen von Troia und der Troas in der Antike, um zu zeigen, wie das kulturelle Gedachtnis der Griechen die Fruhgeschichte dieser nord-agaischen Region rekonstruiert hat.Das kulturelle Gedachtnis der Griechen gliederte die Fruhgeschichte der Troas in zwei Bevolkerungsphasen. In den mythischen Traditionen werden die Teukrer als das alteste Volk der Region betrachtet. Die Ankunft der Dardaner aus Samothrake, die sich mit der Grundung von Troia verbindet, stellt die zweite mythische Bevolkerungsphase der Troas dar |

| Sommario/riassunto      | This collection highlights the new trend away from rationalism and toward empiricism in the epistemology of modality. Accordingly, the book represents a wide range of positions on the empirical sources of modal knowledge. Readers will find an introduction that surveys the                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

field and provides a brief overview of the work, which progresses from empirically-sensitive rationalist accounts to fully empiricist accounts of modal knowledge. Early chapters focus on challenges to rationalist theories, essence-based approaches to modal knowledge, and the prospects for naturalizing modal epistemology. The middle chapters present positive accounts that reject rationalism, but which stop short of advocating exclusive appeal to empirical sources of modal knowledge. The final chapters mark a transition toward exclusive reliance on empirical sources of modal knowledge. They explore ways of making similarity-based, analogical, inductive, and abductive arguments for modal claims based on empirical information. Modal epistemology is coming into its own as a field, and this book has the potential to anchor a new research agenda.
