The present tense in headlines; 6.1 The defaultness of the present tense in news headlines; 6.2 Deictic and non-deictic tense; 6.3 Present time reference of the simple present tense; State present; Habitual present; Instantaneous present; 6.4 Past-time reference of the simple present tense; Semantics of the past-time reference of the present tense; Historic present; Tense as an evaluation device; Deictic centre projection; 6.5 Future time reference of the simple present tense; 6.6 Potential ambiguity of the simple present tense in headlines
Manipulation of temporal deixis
7. Other tenses in headlines; 7.1 Expressing futurity; To-future; Modal auxiliaries; Will-future; Lexically expressed future; 7.2 The present perfect; Headlines marking trends and changes; Heteroglossic headlines; Dual headlines; 7.3 The simple past tense: From heteroglossia to information flow management; The past tense in the non-authorial accessed voice; The past tense in the paper's authorial voice; The past tense as a marker of non-recency; The past tense, subordination and information flow; The past tense as a marker of accessed voice
Other uses of the simple past tense - the non-factive presupposition

Sommario/riassunto

This book provides the first comprehensive account of temporal deixis in English printed and online news texts. Linking the characteristic usage of tenses with the projection of deictic centres, it notes how conventional tenses, particularly in headlines, are affected by heteroglossia arising from various accessed voices. The resulting tense shifts are interpreted pragmatically as a conventional reader-oriented strategy that creates the impression of temporal co-presence. It is argued that since different tense choices systematically correlate with the three main textual segments of news texts
