

1. Record Nr.	UNINA9910811634103321
Autore	Wojcicki Adam
Titolo	Constraints on suffixation : a study in generative morphology of English and Polish / / Adam Wojcicki
Pubbl/distr/stampa	Tubingen : , : Max Niemeyer Verlag, , 1995
ISBN	3-11-095889-9
Edizione	[Reprint 2015]
Descrizione fisica	1 online resource (108 pages)
Collana	Linguistische Arbeiten ; ; 340
Disciplina	415
Soggetti	Polish language - Suffixes and prefixes English language - Suffixes and prefixes Generative grammar Grammar, Comparative and general - Morphology
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Frontmatter -- Table of contents -- Preface -- Chapter I. Theoretical Background -- Chapter II. Constraints on stem-based suffixation in English - the predictions of lexical phonology -- Chapter III. Constraints on the base of morphological rules - verbalizing suffixes in polish -- Chapter IV. Constraints on the operation of morphological rules - deverbal suffixation in Polish -- Concluding remarks -- References
Sommario/riassunto	The book is a generative study of a number of English and Polish processes of suffixation. It focuses on various constraints on such processes. The allomorphy of English inflection is shown to follow from language-specific constraints on syllable structure. English derivational suffixes are shown to be crucially sensitive to the morphological make up of their bases - the majority fails to attach to a suffixed stem, while the rest attaches to a well-defined subset of all suffixed stems. Thus some major tenets of the current mainstream generative theory of the lexicon (Affix Ordering Generalization and Bracket Erasure Convention) are called into question. A detailed discussion of verbalizing processes of contemporary Polish reveals that rules of suffixation are subject to constraints on their bases the proper formulation of which specially involves the distinction root/stem. Markedly distinct characteristics of

root-based and stem-based morphological rules are thoroughly discussed. The productive deverbal morphological processes in Polish are shown to require access to more than one component formative in the base, which seriously undermines some constraints advanced in the literature (Adjacency condition, Atom condition).
